St. Jude Children’s Research Hospital is leading the way the world understands, treats and defeats childhood cancer and other life-threatening diseases.

St. Jude freely shares the discoveries we make, so one child saved at St. Jude means doctors and scientists worldwide can use that knowledge to save thousands more children.

For nearly 60 years, St. Jude has had a history of taking on many of the most difficult and underserved pediatric diseases. Treatments invented at St. Jude have helped push the overall childhood cancer survival rate 20% when the hospital opened in 1962 to 80% today. We won't stop until no child dies from cancer. Thanks to the generosity of people like you, **families never receive a bill from St. Jude for treatment, travel, housing or food** — because all they should worry about is helping their child live.
